August 2020

Even though COVID “changed” the way we do things, it doesn’t stop us from learning and having fun! 😊

Dear Parents,

During this time, teaching children to be safe is very important. At Wee Care we are working on two major ways to keep children safe by practicing social distancing and washing their hands. Children can learn about these through games and activities both at home and at school. Social distancing can be discussed with children and explained using their bodies. Have children use their arms as a measurement for how far away people should stand. You can also use imaginative play and utilize stuffed animals to visually explain social distancing. Remember children learn through play, so make it fun! It is recommended that to effectively fight germs, people should wash their hands with soap and water for a minimum of 20 seconds. Here is a list of recommended songs to sing while washing your child’s hands: “The ABCs”, “Twinkle, Twinkle Little Star”, and “If You’re Happy and You Know It”. Talking to your child about how “bad germs” can affect them will help them to understand the importance of washing their hands. Remember to scrub all the parts of your hands: tops, bottoms, and in-between the fingers. We are looking forward to a fun-filled summer with the students who have returned to us!

Please make sure to read the Activity calendar for the month. We have planned a lot of fun activities. Don’t forget to follow us on Facebook

<https://www.facebook.com/weecarepreschoolchulavista/> to see pictures and videos😊

Have a complete change of clothes in your child’s cubby. All children need his/her own blankets. Due to COVID we do not want to have children share blankets.

Please keep all toys at home.

Label all masks, jackets and other clothing brought into the school.
